

1. Business and Technology Challenges Faced by Electronics Industry at the Beginning of the III-rd Millennium
Janusz Ptak
2. The Future Alternatives of Tin-Lead in PCB Assembly
Jan Felba, Kazimierz Friedel, Ryszard Kisiel
3. Attachment Process for Ceramic and Glass Structures with Gold Bumps on FR-4 Board
Zbigniew Szczepański, Jerzy Kalenik, Arkadiusz Gmitrzak
4. Current Trends in Flip-Chip Bonding Technique for Multichip Modules - Especially Micro-Jet Printing
Barbara Bober, Andrzej Bochenek, Bronisława Olszewska-Mateja, Zbigniew Żaluk
5. Electronics and Nature Can Be Compatible (Enable)
Nihal Sinnadurai, Harry K. Charles
6. Thick-Film and LTCC Thermistors
Andrzej Dziedzic, Leszek J. Golonka
7. Some Applications of Thick-Film Strain Gauge
Darko Belavic, Marko Pavlin, Slavko Gramc, Marina Santo-Zarnik, Marko Hrovat
8. Realization of Microfluidic Modules using LTCC
Lars Rebenklau, Klaus-Jürgen Wolter, Steffen Howitz
9. The Effects of Overglazing on the Performance of Microwave Thick-Film Circuits in the Frequency Range 8-18GHz
C. E. Free, K. E. G. Pitt, Z. Tian
10. Impact of Technological Integration on Actual Development in Electronics
Ivan Szendiuch
11. Wide Bandgap Materials in Future Electronic Applications
Peter J. Gielisse
12. A Method for the Prediction of Microwave Properties from Physical Measurements and DC Conductivity
Keith Pitt, Małgorzata Jakubowska and Charles Free
13. Polymer Paste for Ion-selective Electrodes. Potentiometric Measurements of Cu-ions Concentration
Selim Achmatowicz, Małgorzata Jakubowska, Elżbieta Zwierkowska, Robert Koncki, Łukasz Tymecki
14. PA-CVD Technique for New Materials Deposition
Bigaj, T. Stapiński, S. Jonas, E. Walasek
15. An Investigation of the Ageing Behaviour of Thick-Film Resistors
Darko Belavic, Ivan Lahne, Dubravka Rocak, Marko Hrovat
16. Physical and Technological Properties of Low Residue No-Clean Solder Paste for Fine-Pitch Technology
Krystyna Bukat
17. The Electrical Properties of Hybrid Multicomponents Resistive Layers
Andrzej Cichocki, Michał Cieź, Wojciech Grzesiak, Jan Kulawik, Piotr Kowalik, Zbigniew Prusowski, Krzysztof Waczyński
18. Macro- and Microstructure of LTCC Tapes and Components
Andrzej Dziedzic, Leszek J. Golonka, Jarosław Kita, Janusz M. Kozłowski
19. Metal Foil Screens - Manufacturing and Techniques of Printing
Barbara Dziurdzia, Stanisław Nowak, Michał Cieź, Wojciech Gregorczyk
20. Perovskites as Materials for Electrodes
Joanna Gandurska, Irena Śnieżyńska, Anna Marek, Dorota Szwagierczak, Jan Kulawik

21. Laser and Electric Impulse Treatment of MDM-Structures
Yurij Lozinski, Zenon Gotra
22. Influence of Dynamic Temperature States on Degradation Processes in Thick-film Resistors
Włodzimierz Kalita, Mariusz Węglarski, Stanislav Slosarčik
23. Lead Free Solder Joint Properties in High Temperature Applications
Ryszard Kisiel, Jerzy Kalenik
24. Electrically Conductive Adhesives in SMT - the Influence of Adhesive Composition on Mechanical and Electrical Properties
Ryszard Kisiel, Andrzej Mościcki
25. Microstructure and Electrical Properties of Slug-Type Resistors Based on B₄C and TiC - ESCA - XPS and Impedance Spectroscopy Investigations
Ewa Klimiec, Tomasz Stobiecki, Wojciech Bąk, Franciszek Starzyk, Wiesław Zaraska
26. Characterization of Dielectric Properties of Pb(Zn_{1/3}Nb_{2/3})O₃ Ferroelectric Ceramics
Jan Kulawik, Dorota Schwagierczak, Joanna Gandurska, Anna Marek, Irena Śnieżyńska
27. Some Applications of Metal-Dielectric-Metal Technology
Yurij Lozinski, Zenon Gotra, Dariusz Klepacki
28. Application of ICSV Technology in Manufacturing Thick-Layer CdTe Solar Cells
Maciej Sibiński
29. Assessment of Solder Paste Tackiness by Meniscograph Using
Janusz Sitek
30. Electrical Properties of Silver and Lithium Sulphate
H. Teterycz, K. Nitsch, K. Wiśniewski
31. Microscopic Study of the Structure of the SnO₂ Thin Films Obtained by the RGTO Technique
Jerzy Uljanow, Krzysztof Waczyński, Adam Broja, Teresa Karczewska-Buczek
32. The Electrophysical Properties of Spin-on Glass for Dielectric Passivation and Planarization
Krzysztof Waczyński, Edyta Wróbel, Stanisław Łoś
33. Determining Dopant Concentration Profile in Silicon by Using Electrochemical Profile Plotter
Edyta Wróbel, Kazimierz Drabczyk, Krzysztof Waczyński, Iwona Zborowska-Lindert
34. Thermal Modelling and Optimisation of Hybrid Thick-Film Structures
Marina Santo Zarnik, Srečko Maček
35. The Evaluation of Magnetron Sputtered Si-Me Films for Sensors
Grażyna Beensh-Marchwicka, Eugeniusz Prociów
36. Dynamic Properties of Thick-Film Laser Power Detector
Grzegorz Błąd, Jerzy Potencki
37. Surface Modification of Semiconductors Under the Action of Laser Radiation
Olexander Bonchuk, Zenon Gotra, Stepan Kiyak, Ivan Lopatynsky, Władysław Proszak, Grygorij Savitski
38. Intelligent Microelectronic Starters
Jacek Austyn, Michał Cieź, Wiesław Prochwicz, Krzysztof Witek
39. Behavioural Modelling and Practical Verification of Chemically Sensitive pH-ISFET Sensor
Marcin Daniel, Michał Szermer, Krzysztof Ślusarczyk, Andrzej Napieralski
40. New Hybrids High-Reliability AC-DC Converters for Halogen Lamps
Janusz J. Gondek, Michał Wachta, Marek Korpak, Janusz Pawełczyk, Wiesław Zaraska, Jan Kocoł
41. Formation of Heterostructure of A₃B₆ Semiconductor Compounds by Surface Laser Modification
Zenon Gotra, Pavlo Stakhira, Ihor Tokarev, Władysław Proszak

42. Influence of Heater Geometry and Basic Material on Temperature Field Distribution on Gas Sensor Surface
Dariusz Klepacki, Zenon Gotra
43. Optical Method for Control of Thin Film Thickness During Evaporation
Yurij Lozinski, Zenon Gotra, Kazimierz Kamuda, Dariusz Klepacki
44. An Intelligent Electronic System of a Reserve Mains Voltage Source
Wojciech Grzesiak, Tomasz Maj, Jerzy Początek
45. Computer Controlled AC Stabiliser
Michał Cieź, Wojciech Grzesiak, Tomasz Maj, Jerzy Początek
46. DC/AC and DC/DC Inverters
Wojciech Grzesiak, Tomasz Maj, Jerzy Początek, Jan Koprowski
47. Consideration on Wide Bandgap Amorphous and Microcrystalline Silicon for Solar Multijunction Cell and X-ray Sensor
Andrzej Kołodziej, Paweł Krewniak, Stanisław Nowak
48. Foundations for the Development of Polymer - Carbon-Black (Graphite) - Carbon Fibre Composites
Andrzej Łukasik, Stanisław Błażewicz
49. Analytical Calculation of the Radio Wave Trajectory in the Ionosphere
Janusz Młynarczyk, Julien Caratori, Stanisław Nowak
50. Photoacoustic Approach for Si_{1-x}Ge_x Thermal Parameters Measurements
Patrin, N. V. Abrosimov, M. Maliński, L. Bychto
51. An Optoelectronic System Realizing a NAND Logical Function
Zbigniew Porada, Elżbieta Schabowska-Osiowska
52. Thermal Sensors with Controlled Sensitivity
Tadeusz M. Berlicki, Stanisław J. Osadnik, Eugeniusz Prociów
53. Technology of Obtaining a New Glycin Compound Monocrystal for Active Elements of Pyroelectric Detector
Władysław Proszak, Mariusz Trybus, Bogdan Woś
54. EMC Aspects in Design of Thick-Film Wide-Band Amplifier of Small Signals
Wiesław Sabat, Włodzimierz Kalita, Bogusław Wisz, Dieter Sperling
55. Hybrid Radio Digital Receiver Designed for the Kosmon System
Piotr Szatyński, Jerzy Początek
56. Test of Spatial Resolution of Infrared Camera Assigned for Thermal Measurements on Electronic Microcircuits
Tadeusz Wałach
57. Preparation and Characteristics of Te-Doped CoSb₃
K. T. Wojciechowski, A. Małecki, R. Mania, J. Obłąkowski
